### DAYTON PROGRESS

DAYTON PROGRESS is a specialist for punching standards. Whether it's punches, die buttons, or retainers according to standards, norms, or customer requirements, we have a solution and the right accessories for you. Our extensive experience with OEM norms and industry standards makes us the ideal partner for you.

a MISUMI Group Company

### MISUMI GROUP

In 2012, DAYTON PROGRESS was acquired by the Japanese MISUMI Corporation. In addition to our own products, we also offer supporting products from MISUMI. This enables us to provide everything a punching tool needs. Join us and embark on a future together.

## DAYTON PRODUCT VARIETY

Thanks to our expert knowledge combined with the latest manufacturing technologies and materials, our products consistently meet the highest quality standards. Whether standard or precision work, we have the right component for any application. Staying up-to-date and continuously expanding our product range is important to us.

## MISUMI PRODUCT VARIETY

MISUMI is the world's leading supplier of configurable mechanical components for special machine construction, injection mould making and punching tool construction. The acquisition allowed DAYTON PROGRESS to expand MISUMI's extensive product range. The MISUMI product portfolio includes:

- mechanical components
- screws, bolts, washers, nuts
- semi-finished products
- cables and connectors
- control technology
- cutting tools
- production and manufacturing technology
- components for punching tool construction
- components for injection moulding tool construction

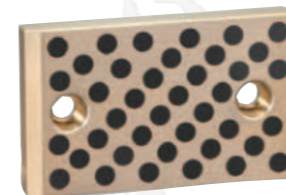

### SPECIAL PARTS

# CUSTOM-MADE PRODUCTS & FINISHING

STANDARD OR SPECIAL, WE DO IT ALL

Are you looking for a special punch shape or a special die button? You've come to the right place. We are happy to advise you and produce your desired product according to your data and requirements. DAYTON PROGRESS is your specialist for custom shapes and 3D contours. Your data can be archived with us upon request and retrieved by you at any time.

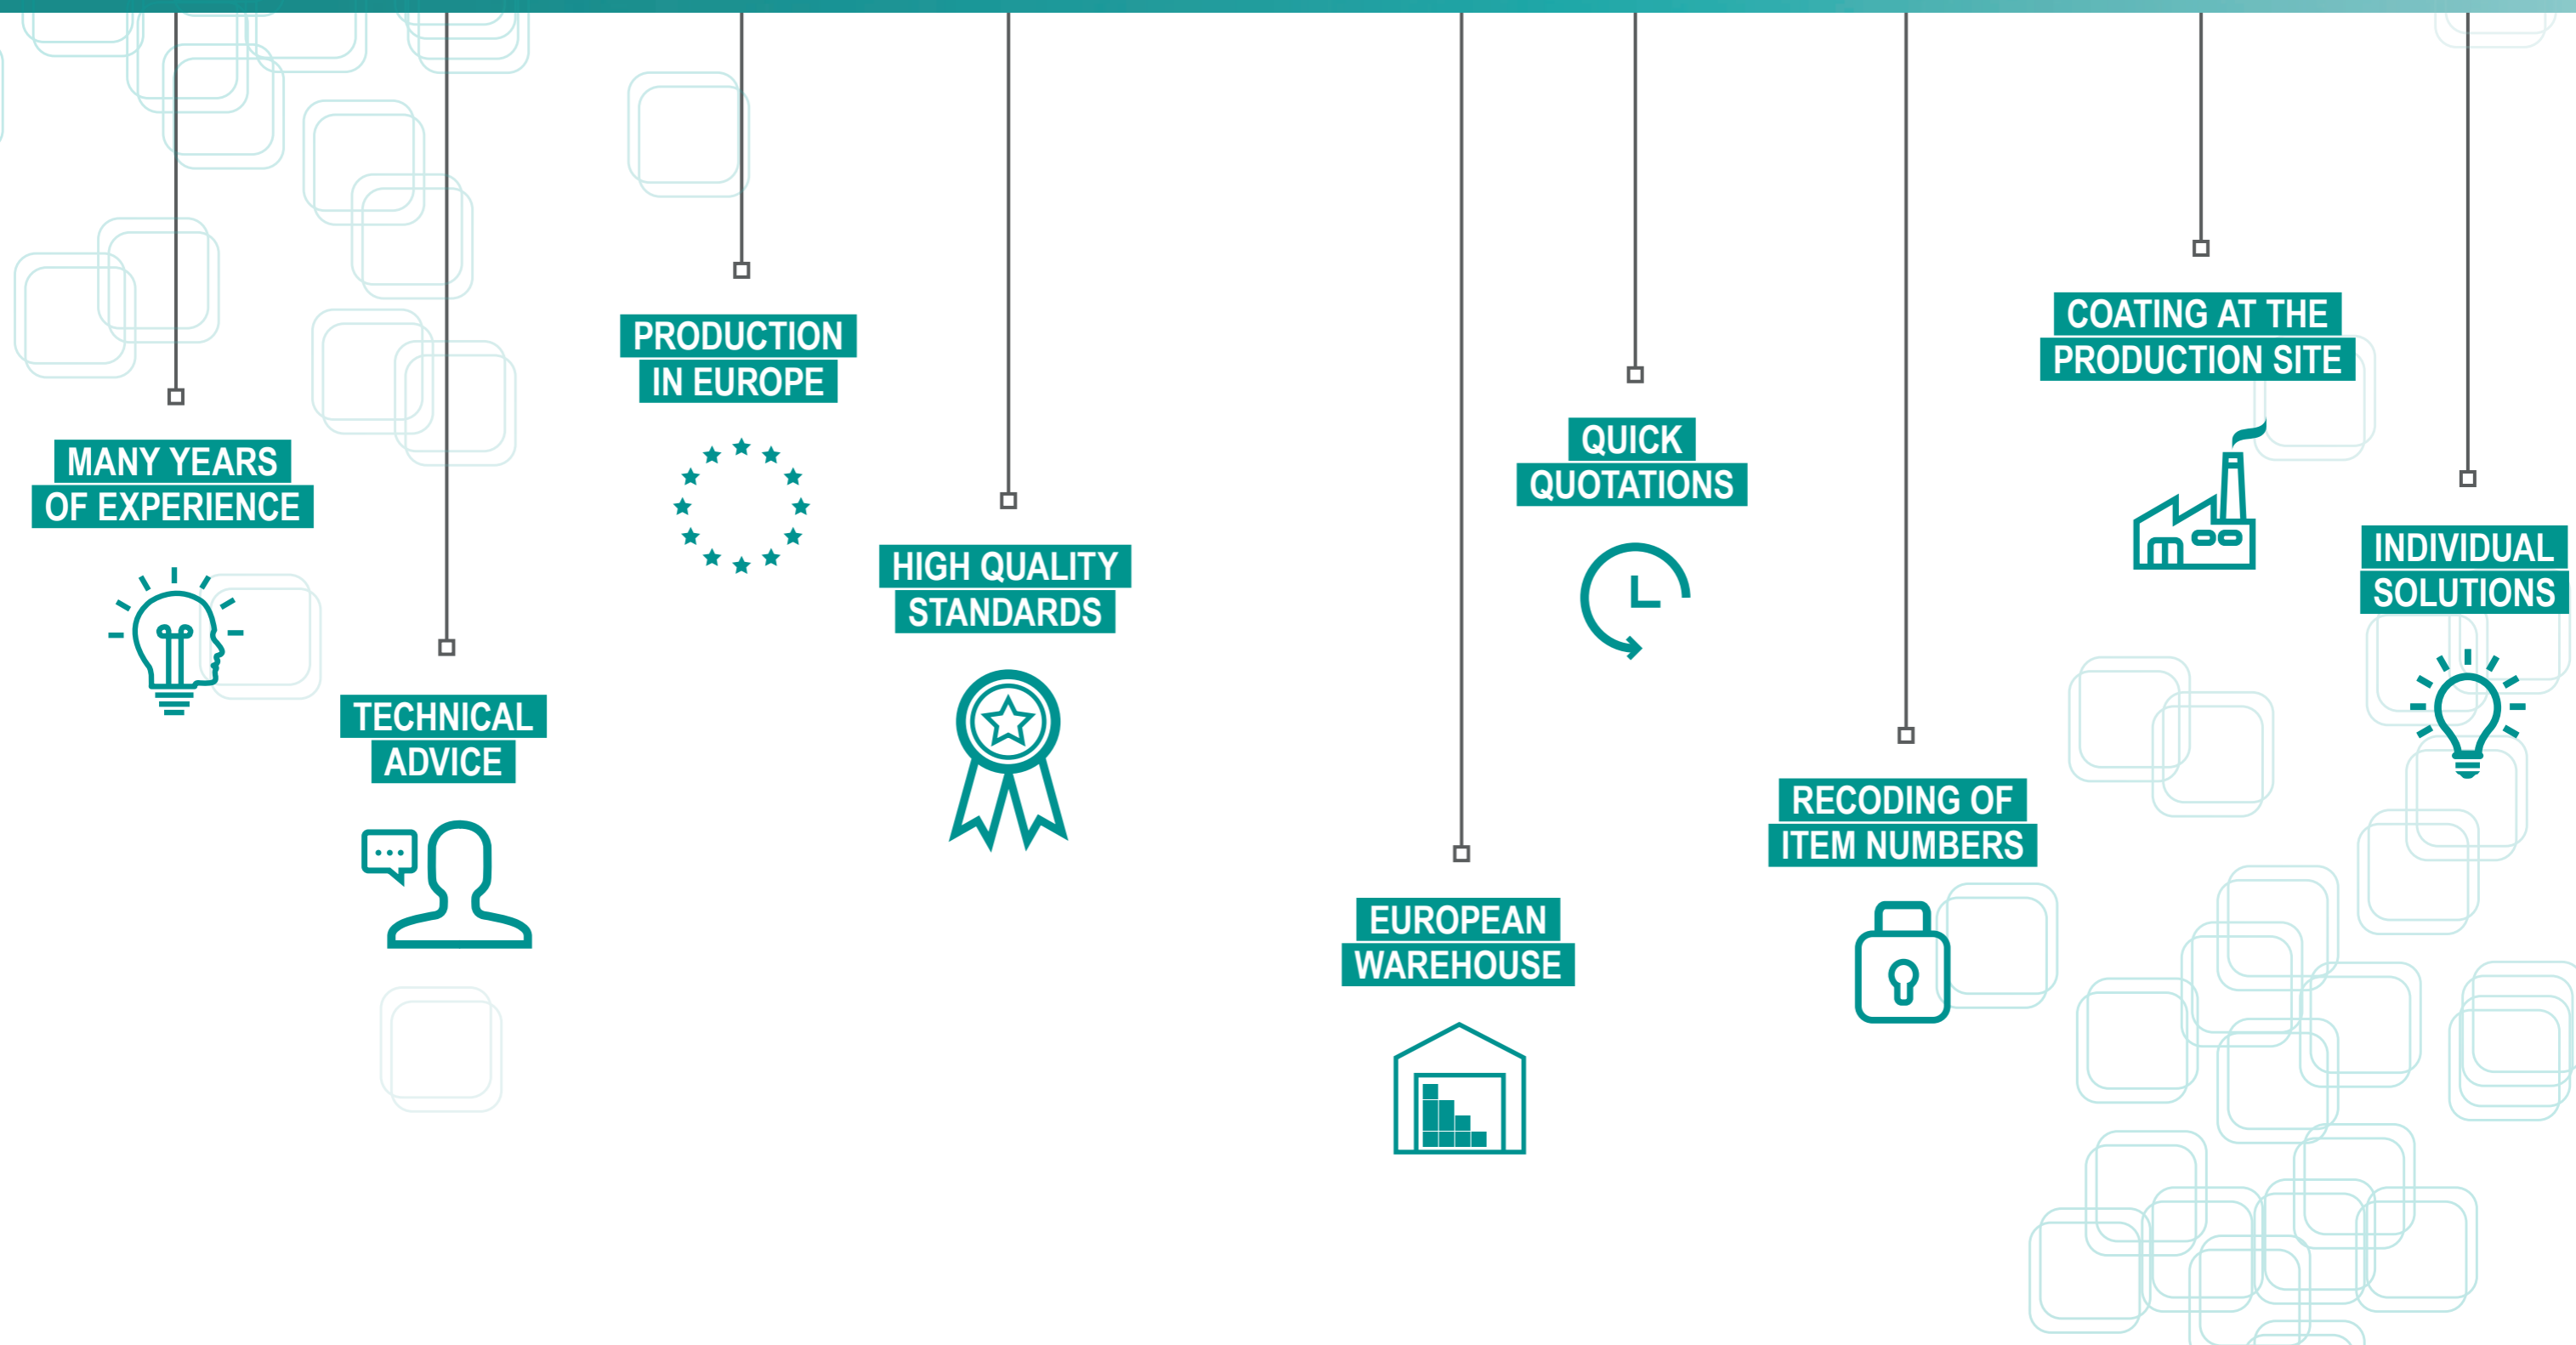

## REFINE YOUR PUNCHING PROCESS!

In collaboration with our partner Oerlikon Balzers, we offer the full range of BALINIT coatings. Together, we will find the perfect coating to meet your individual needs. Additionally, you save time as Oerlikon Balzers operates an „in-house“ coating centre at our location, ensuring your components are immediately handed over for coating after production. DAYTON PROGRESS coated components are heat-treated, precision-ground, and made from high-performance steels. Our basic offering includes six types of steel, with options for expansion as desired.

# YOUR ADVANTAGES

9 REASONS WHY WE ARE THE RIGHT PARTNER FOR YOU

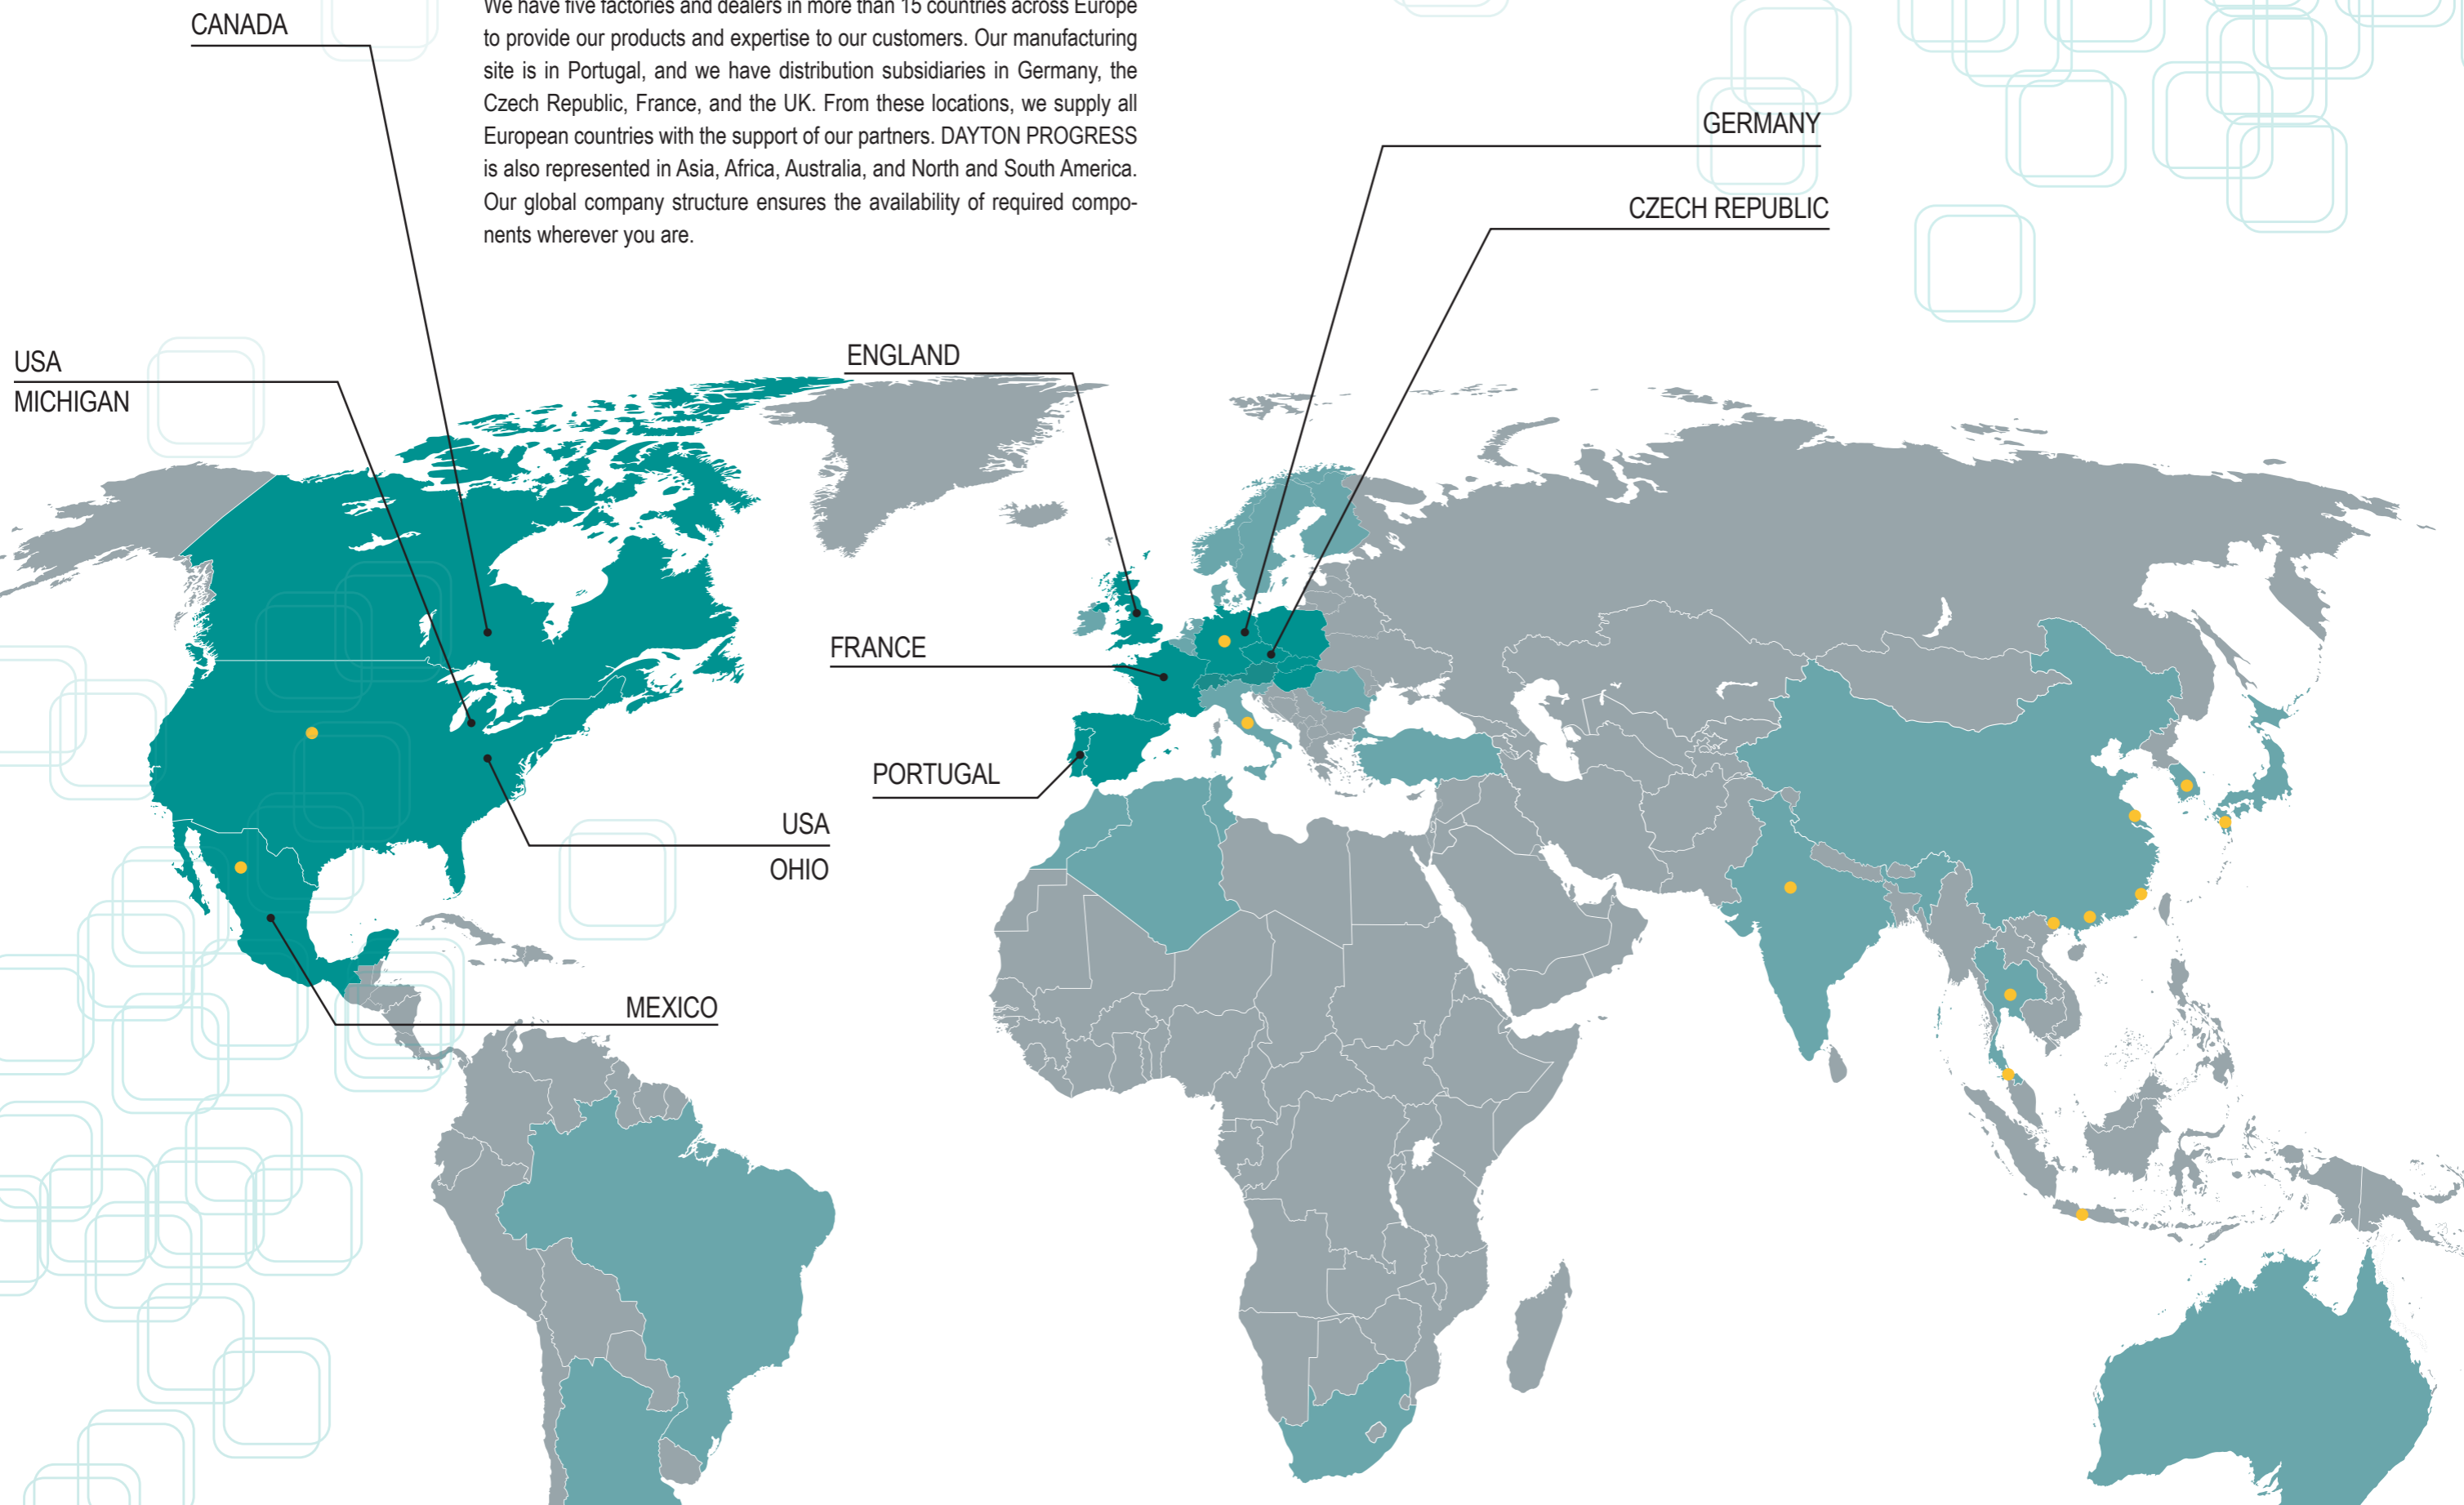

# INTERNATIONAL PRESENCE

WE'RE EVERYWHERE YOU NEED US

We have five factories and dealers in more than 15 countries across Europe to provide our products and expertise to our customers. Our manufacturing site is in Portugal, and we have distribution subsidiaries in Germany, the Czech Republic, France, and the UK. From these locations, we supply all European countries with the support of our partners. DAYTON PROGRESS is also represented in Asia, Africa, Australia, and North and South America. Our global company structure ensures the availability of required components wherever you are.
